Depok, Jawa Barat, 16473

Education

Universitas Terbuka Jul 2020 - Oct 2025

Graduate Mathematics Student, GPA: 3.44/4.00 Jakarta, Indonesia

- Completed core coursework including Calculus I-III, Computer I, Elementary Linear Algebra I-II, Statistical Methods, and Introduction to Probability.
- Co-authored articles with lecturers on the application of machine learning in education and conducted a Systematic Literature Review (SLR) on lung cancer during the COVID-19 era using Python.

Work Experience

Teman Data Jun 2026 - Present

AI Engineer Remote

- Designed and built an automated social media reporting workflow on n8n by combining YOLO for visual content recognition and Gemini 2.5 for multi-modal text and data analysis.
- Developed MVPs for key AI intelligence verticals: Email AI Intelligence with a chat knowledge base over full email content, Ordering Intelligence featuring raw food ingredient quantity demand forecasting, and Procurement Intelligence to automate business operations.

Asa Ren Oct 2024 - May 2026

AI Engineer, Full Time Onsite

- Architected end-to-end RAG pipelines and lab test OCR systems with OpenAI, pgvector, AWS Lambda, and SAM CLI, incorporating PostgreSQL for cost tracking.
- Designed a Virtual Assistant with multi-pipeline workflows (memory saving, soft-selling, upselling) and integrated Langfuse for evaluation and performance tracking.
- Developed domain-specific AI agents and grounding search pipelines to automate RSID identification and accelerate pharmacogenomic research.
- Built a Multi-Agent Content System using Critic and Refiner agents for self-correcting USP mini-reports, alongside an automated avatar positioning pipeline.
- Created high-throughput web scraping scripts for SNPTracker and Family TreeDNA to streamline research data extraction.

Braincore Jan 2024 - Present

Lead Divisi Engineering, Freelance Online

- Monitored computer vision and AI projects, including Driver Monitoring System, Palm Oil Ripeness Detection, Cartoon/Real Image Classification, and Blur/Bokeh Detection, while mentoring team members and providing technical guidance.

PT Seleris MediaTekno Internasional Oct 2023 - Oct 2024

AI Engineer, Full Time Onsite

- Engineered a robust KTP OCR system using YOLO for text detection and deep learning with CTC loss for accurate text recognition.
- Designed and implemented a user-friendly chatbot to enhance customer interaction and streamline communication processes.
- Architected and implemented a scalable queue management system using RabbitMQ to optimize workflow efficiency.
- Developed and integrated RAG using gpt-4o-mini to process and analyze internal company documents (PKB and PP).

Skills & Technologies

- **Tools & Technologies:** Python, FastAPI, LangGraph, Docker, Google Apps Script, SQL, PostgreSQL, pgvector, AWS Lambda, AWS SAM CLI, GCP Cloud Run, n8n, OpenCV, YOLO, Gemini 2.5, OpenAI API, Langfuse, RabbitMQ, HTML, JavaScript, CSS, Tableau, R/R Studio.
- **Soft Skills:** Problem Solving, Analytical Thinking, Leadership, People Development, Communication, Teamwork, Data Storytelling, Public Speaking, Continuous Learning.

Organizational Experience

Rumah Pintar, Paguyuban Karya Salemba Empat Oct 2020 - Jul 2022

Head of Curriculum Division | Universitas Indonesia Depok, Indonesia

- Managed team members to foster collaboration, structured tasks, assigned PICs, and earned the "Best Teacher" award within 2 months.
- Developed 13 courses with the team for UTBK 2022 preparation, taught 30+ students weekly, and conducted biweekly tryouts to evaluate progress.
